migui *Function to Execute the Graphical User Interface*

Description

This function intiates the Graphical User Interface (GUI) for the **mi** package, making it easier to walk through the series of steps that are necessary to impute missing values and analyze completed data

Usage

```
migui(tk = "tcltk")
```

Arguments

tk	Character string indicating which toolkit to use. Currently, only "tcltk" (the default) is viable.

Value

Nothing is returned.

Note

The GUI requires one of the backends supported by the **gWidgets2** package. At the moment, the only backend that is still on CRAN is provided by the **gWidgets2tcltk** package.
